

TRENDS IN KITCHEN REMODELING

Kitchen remodeling projects rank the most popular in home improvements. It's important to consider the trends when remodeling. For example, cabinets have gone modern with systems concealed behind sliding doors, floating units and touch-latch fronts. Also, innovative new surfaces like high-gloss lacquer and bamboo are popular. You may even want to consider dual-fuel ranges. These ranges combine the power of an electric stove and gas cooktop. Choose from a modern stainless steel stove or an old-fashioned cast iron one. Whatever kitchen home remodeling style you select, it should have a 21st century appeal. We do both small and large kitchen remodels.
