

POPULAR BATHROOM REMODELING PROJECTS

Today, the bathroom is no longer just a utilitarian space. Both homeowners and homebuyers are seeking convenience and luxury. Popular high-tech twists include mood-enhancing colors, built-in audio systems and tub-side refrigeration. Consider adding a tricked out shower with functions like temperature, water pressure and steam. Use tile and mosaics as a decorative backdrop that will add a touch of art and splash to the bathroom. And goodies like hands-free faucets and radiant floor tiling go a long way. With a few extras, you can easily create a spa-like haven to enjoy and relax in.
