

ADDING A DECK FOR OUTDOOR LIVING SPACE

There's no better way to enjoy the sunny days in Florida than relaxing on your own custom build deck. With a variety of building materials, features and styles to choose from, a deck can be designed to fit your budget and personal style. A deck increases living space and is a great addition for enjoying the outdoors and entertaining friends and family. Plus, it adds value to the home. According to Remodeling Magazine, the cost of a deck can be recouped by 75 percent upon resale. That's a high return on a home remodeling project.
